**GEOLOGIC SETTINGS AND
PETROLEUM SYSTEMS OF INDIA'S
EAST COAST OFFSHORE BASINS
Concepts & Applications**

Contents of Book on GEOLOGIC SETTINGS AND PETROLEUM SYSTEMS OF INDIA'S EAST COAST OFFSHORE BASINS - CONCEPTS & APPLICATIONS

SECTION - I

INDIAN SEDIMENTARY BASINS, THEIR EVOLUTION, CATEGORIZATION AND EXPLORATION PLAY TYPES.

Chapter-1

Status of Hydrocarbon Exploration and Production in India

- 1.1 Historical Perspective
- 1.2 Oil and Gas Demand and Supply
- 1.3 New Initiatives in Exploration
- 1.4 Change in Exploration Scenario
- 1.5 Categorization of the Indian Sedimentary Basins

Chapter-2

Plate Tectonics and Evolution of the Sedimentary Basins

- 2.1 Regional Geology and Tectonic Setting of India
- 2.2 Break-up of Gondwanaland and Emergence of the River Systems
- 2.3 Plate Tectonics
- 2.4 Tectonic Setting of the Indian Sedimentary Basins

Bibliography

Chapter-3

East Coast Sedimentary Basins

- 3.1 East Coast Sedimentary Basins
- 3.2 Commonality in Stratigraphy and Lithology
- 3.3 Rift Architecture
- 3.4 Anomalous Features Identifiable on Gravity Maps

Bibliography

SECTION - II

DEEPWATER DEPOSITIONAL PROCESSES AND THEIR INTERPRETATION INTEGRATING DIFFERENT DATA SETS PARTICULARLY IN KRISHNA-GODAVARI DEEPWATER BASIN.

Chapter-4

An Overview of Deep-water Depositional Processes: East Coast of India

- 4.1 Deep water Depositional Processes
- 4.2 Deep water Sedimentological Models
- 4.3 Sequence Stratigraphic Setting
- 4.4 Deep-water Processes Observed in the East Coast Basins

Bibliography

Chapter-5

Tectono-stratigraphy and Depositional Patterns: Krishna Offshore Basin

Chapter-6

Reservoir Architecture of Tertiary Deep - water Sedimentation: Krishna-Godavari Basin

- 6.1 Seismic Interpretation and Geologic Model
- 6.2 Seismic Inversion

Bibliography

Chapter-7

Linking Shelf Delta to Deep Water in the Krishna-Godavari Basin

- 7.1 Sequence Stratigraphic Framework
- 7.2 Interpretation of Seismic Data

Bibliography

SECTION - III

FEW IMPORTANT TECHNIQUES USED IN CHARACTERIZING DEEPWATER RESERVOIRS AND IN MINIMIZING DEEPWATER DRILLING HAZARDS.

Chapter-8

Wireline-log Response and the Depositional Environment

- 8.1 Clastic Environment
- 8.2 Carbonate Environment
- 8.3 Wireline Logs and Lithology Indication

Bibliography

Chapter-9

Thin Bed Reservoir Characterization

- 9.1 Reservoir Description
- 9.2 Petrophysics and Rock Physics
- 9.3 Simultaneous Geostatistical Inversions
- 9.4 Reservoir Modeling

Bibliography

Chapter-10

Minimizing Deep-water Risks

- 10.1 Electromagnetic methods for finding hydrocarbon reservoirs
- 10.2 Minimizing Deep-water Drilling Hazards

Bibliography

Selected Glossary

ABOUT THE AUTHOR

Dr. Ravi Bastia, Sr. Vice President, is currently heading the exploration operations at Reliance Industries Ltd. Reliance is operating several onland and offshore exploration acreages, both in India and abroad, spread over complex geological settings. Under his leadership, many significant discoveries have been made in Krishna Godavari and Mahandi Basins.

Dr. Bastia holds a Ph.D. in Structural Geology from IIT-Kharagpur, India and M.S. in Petroleum Exploration from Norwegian Technological University, Norway.

To his credit, he has bagged several scientific and professional excellence awards, both in the national and international sphere. Some of his recent awards include the Gold Medal during the AEG Conference at Hyderabad in 2006, the National Mineral Award for the year 2003, The Society of Geoscientists & Allied Technologists award in 2002 and the best Symposia Speaker Award at Brazil in 2000. He has been the keynote speaker in many international conferences.

Dr. Bastia has authored more than fifty publications in several scientific journals and is also a visiting faculty to many Universities.
